How do you get the Rohde & Schwarz 30% trade-in promotion?

The 30% discount only applies to the purchase of a new R&S®RTM3000 and/or R&S®RTA4000 oscilloscope with a bandwidth of at least 350 MHz (required upgrade) and only when one of the instruments listed above is traded in at the time of purchase. Your Rohde&Schwarz subsidiary or authorized channel partner can provide you with further details.

The 30% discount applies to the base unit and available bandwidth upgrades. Further hardware and software options are excluded from the discount. This promotion cannot be combined with other promotions.

What are the benefits of the Rohde & Schwarz 30% trade-in promotion?

If your current oscilloscope is no longer serviced or is subject to high service prices, or if your oscilloscope doesn't have enough memory, it is time for a new oscilloscope. The R&S®RTM3000 and R&S®RTA4000 oscilloscopes offer a wide range of benefits and unique features.

- 10-bit ADC, four times more vertical resolution than standard 8-bit ADCs
- 80 Msample/200 Msample of memory, which is at least 10 times more than similar oscilloscopes in the same instrument class
- 10.1" display with capacitive touchscreen (1280 x 800 pixel)
- Wide range of trigger and decode options on serial buses
- Outstanding input sensitivity down to 500 $\mu\text{V}/\text{div}$
- 10 s boot time
- 3-year warranty
